In today’s world, universities are not only knowledge-providing institutions but also the driving force behind innovation, policy influence and industrial transformation, he said, adding that in building and community construction, they should not only be environmentally friendly but also supportive of human health, inclusive and sustainable.

The special guests were Md Khalequzzaman Chowdhury, chief engineer of the public works department of the Ministry of Housing and Public Works; dean of the CUET’s faculty of architecture and planning Professor Muhammad Rashidul Hasan; and head of the department of architecture of BUET Professor SM Nazmul Imam, among others.
