MA classes in Eden Girls College

We are happy to know that the authority of the Dhaka University has kindly sanctioned the Eden Girls' College to be a University College from this year by starting M.A. and M.Sc. Final Classes in three subjects — Bangla, Botany and Zoology from the current session. This is a blessing for a section of girl-students, no doubt. But this scope is limited to students passing the Honours Examination in those three subjects only. A large number of students have recently come out successful in the Degree Pass Examination. They have little opportunity

to study for Master Degree in as they do not venture to face the dark-side of co-education. It is a tough task of obtaining seats in the Dhaka University and its two attached halls for girl-students. Thus there is a huge number of dropouts from higher education every year. As a result, want of qualified female persons to be placed in appropriate positions is keenly felt in every field of nation-building.

Under the circumstances, we appeal to the Government and the authority of the Dhaka University to take active initiative to introduce Preliminary Classes for M.A. and M.Sc. side by side with the Final Classes in the Eden Girls' University College initially at least in those three subjects to provide a large number of girl-students with

Readers' letters

equal opportunity for higher education right from this session by adopting any probable means on priority basis with further plan for future development of the project as a gesture of giving greater facility to Female Education in the country.
