Misuse of teaching

Schools are meant for teaching not for business; but nowadays it is just the opposite. A group of greedy and selfish people are misusing the honourable profession of teaching. In the kindergartens and tutorials the amount of fee is too much. Even after that, the amount of fee is raised at any time without the permission of the Government, and without taking students' problem into consideration.

Very recently such thing has taken place in Naila Memorial Fleur Tutorial. The management has increased the amount of monthly fee from Tk. 250.00 to Tk. 500.00 without giving any information or notice to the students. Previously the miscellaneous charge was

Tk 200.00 which is now raised to Tk 500.00. This is totally illegal and against the law. Such a great rise in fee is very unexpected. They don't even want to make a compromise. For this reason a great number of the students are leaving their studies and joining the 80% uneducated population of our country. It is very difficult to afford so much expense for the studies. Our future is the future of our nation. Therefore, we earnestly beg the Ministry of Education to take urgent and strict action against any mismanagement of education.
