LETTERS FROM READERS

Board for primary school

I endorse the suggestion of one professor who opined in the newspapers that there should be at least four Primary Education Boards in our country. We are to give importance on primary education which should be made compulsory with a view to removing illiteracy from the country.

Varsity education should be restricted and only the

scholars or brilliant students should have chance for post graduation degrees. Primary education should be enhanced upto class VI level. It will benefit the poor students very much. All the primary schools in the country must be 'pucca' buildings as far as possible. Primary schools made of CI sheets may be damaged due to cyclone and gusty wind during norwester in the month of Baishakh. As a result government is to spend a big amount every year.

Establishment of such boards for primary education will not only create more opportunities of employments but also raise the standard of primary education. With

the service of these boards the poor students will be much benefited. The proposed boards will conduct final examinations for the students of class VI. They may conduct a final examinations for class IV students too.

We hope the government will examine the proposal of opening of 4 Primary Education Boards if considered to be beneficial for the country.
