

Getting of admission in colleges by the students securing third division in S.S.C. examination has been a great problem. Their admission in government colleges is totally restricted and in private colleges too they are hardly encouraged. They are almost totally neglected by all and therefore deprived of getting any higher educational facilities.

These students cover a great majority of about 60 per cent against 40 per cent of the students securing first and second divisions. I think they are above the average students enrolled in our schools. Even when this

students of the country. So these students too must be given due shares facilities and privileges of education in colleges and universities without any obstruction. They also can do good results and get first or second division if taken care of and given proper coaching as are done for coaching the first or second division students.

make contribution to the government's education budget. Hence the students coming from this group of people should not be kept away from higher education on the plea of bad merit or division only.

We strongly feel, the government should give special attention to the matter, take sympathetic view and immediate action for the students of third division and make provision for their admission in government colleges so that they are not totally deprived of the opportunities for attaining higher education. This action will encourage or motivated the people and also create peaceful atmosphere among the common students which is required most in the interest of reaching educational facilities to the poor people.

Admission Problem

students are given admission in some colleges they are not taken proper care of. This is really a great injustice to them.

The third division students being a great majority should not be ignored because the principle of the present government is decentralisation of education at facilities among all the students without any discrimination so as to reach education to the poor common

The credit of teacher lies with his teaching method i.e. teaching students properly and raising them to a position better than they deserve. The third division students may be elevated to first or second division if guided and motivated in right direction.

The students getting third division generally come from the poor families forming a great majority in this country. These families are
