

HSC exam routine

The HSC examinations of this year is going to be started on and from 13th, June 1987. We have come to know from different newspapers that the routine of this examination has been finalized and will be published through newspapers within a few days. It has been heard from different sources that the routine of this year is very tight as examinations of two papers will be held every day. It has been learnt that this has been done according to the order of the Edu-

cation Ministry. It has been learnt from the authority of the Board that this kind of routine was not seen by them before. It is really a surprising matter. The authority should realise that the students are not angels but human beings. It is not just to do anything for others if that is not acceptable to them. A few of the

officers have taken such an unreasonable decision for which thousands of examinees will have to suffer. Is it not unjust? Normally, we will have to sit idle perhaps, for one year or even more than that after our examination is over. After that we will have to try to get ourselves admitted in some institution. That is why

We cannot understand the meaning of this hurriedness on behalf of the authority concerned, completing our examination within a shortest possible time. It is illogical. So we request the Routine Committee of the HSC examinations to make such a routine which can be suitable to all without creating an unnecessary pressure on the

students

It is encouraging to know that the 13-crore taka development scheme of Bangladesh Agricultural College

has finally received the approval of the planning Commission. There is quite a good chance of materialising other things as I proposed for this college in my letters if we could overcome the personal interests of some people.

Finally, I am extremely thankful and grateful to you for extending your true attention towards our feeling and expression.
