

Medical College in Khulna

Sir,—We welcome the government's recent decision to establish another two Medical Colleges in the country. We believe that setting up of a new Medical College here is one of the legitimate rights and a long awaiting demand of the people of Khulna.

As the educational expenses are increasing day by day and higher education has become a dream to the middle class families man, bright, talented but poor boys can hardly afford to go for higher studies. If the proposed Medical College is established in Khulna it will give opportunity to the talented and less fortunate to continue medical education in Khulna.

Under the above mentioned circumstances it is hoped a Medical College will be established in Khulna as soon as possible in the interest of the people of Khulna.—Yours etc.,
MD. HABIBUR RAHMAN Agri
culture University Myrensingh.
