Primary education

Primary education in Jhenidah subdivision is being hampered due to various problems.

Most of the primary schools of this subdivision lack accommodation facilities and there is shortage of furniture and teaching appliances. As a result, education of more than 45,000 children is being greatly hampered.

Accommodation is a major problem for almost all these primary schools. The number of benches falls far short of the requirement. It is learnt and as such in many schools many students have to sit down on the floor during the class hours.
