Admission To Medical College

Sir,—I fully endorse the views expressed by your correspondent Niharika in these columns of your daily under the above caption published recently. I further add that the Government has considered the age of women in services and increased their reserved seats in the Parliament and services.

So far as medical education is concerned it is particularly suitable for women. So I would request the authority concerned to consider the years of passing the S.S.C. and H.S.C. in their admission to Medical Colleges this year and to increase the number of their seats in the Medical Colleges by admitting them on the basis of their qualifying marks. Yours etc. SUFIA, Senpara Pata Mirpur, Dacca.
