Copying and the examinations

Thanks to Mohtarama Shamima Ahmed for her letter under the caption "Copying and the examinations" (B T 23.3.89). The vice of copying in the examinations is of great significance and no

nation can be a silent onlooker to such a thing. Nation is not likely to get any benefit from such students when ultimately they enter the social life.

Strict vigilance may be the reason of large number of expulsions. But, there are reports that even in this year some centres were open to copying. What is more serious is that some teachers being active associates were also expelled along with the students.

It is only expected that more stringent measures would be taken in examination centres so that this curse in the society is ruthlessly eliminated.
