

Seminar

Dhaka Grammar School will hold a seminar on developing child science literacy at 5 pm on Tuesday at the auditorium of Indian Cultural Centre at Satmasjid Road in the city. The aim of the seminar is to highlight the need of making science curriculum for the primary and secondary level education in the country interesting and appropriate, says a press release.

The school, made an experiment over the years on giving more stress on demonstrative and application oriented curriculum in science rather than continuing with rote-learning. It found tremendous enthusiasm among the students in the process of their learning.

The seminar also aims at creating awareness among the education managers, teachers and students about the need of learning science in a fruitful way. Prof M Shamsul Huq, Chairman of the National Committee for Education policy, will be the chief guest.

Other speakers include Dr Shafiqur Rahman, head of the department of Physics, Allegheny College, Pennsylvania, USA, Dr NA Alam, Advisor of Science, Dhaka Grammar School, Mrs Munira Hussain, Associate Professor, Open University and a student.
