

DU Gymnasium

— Campus Report —

The DU Gymnasium is a world by itself.

The rooms above the football ground gallery and adjacent to the gymnasium are supposed to be used as temporary accommodation by players of different sports and games camps. But usually they are occupied by outsiders securing them either by force or by money. It is alleged that the director is blind to what is going on here.

Mosquito bites are a common feature at the gymnasium. The later it gets the more mosquitoes seem to come here from no where.

The adjacent large drains are overflowing with rubbish making it an ideal breeding place for the mosquitoes. At times when the wind blows the place stinks. In some places it is green with algae.

The toilets (both for male and females) are in unusable condition. One cannot marvel but wonder at the sweepers' job. These places are never disinfected or cleaned properly. Only on occasions when visitors are supposed to come here is the place cleaned.

Theft is a common thing here. A number of expensive

weight lifting instruments have been stolen. At times it is not uncommon for a visitor to the gymnasium to find that his belonging is gone. There is problem with the lockers too.

As the windows of the gym are usually kept closed the place is suffocating. Why are these kept closed is only known to the concerned authorities. Even drinking water is a far cry.

The least said about night the better. With the setting of the sun it becomes Las Vegas for the hoodlums, criminals and so on. Even students are scared to go there.
