The department of civil engineering at Chittagong University of Engineering and Technology organised a seminar titled 'Resilient Civil Infrastructure for the Future: A Journey from Earth to Space' on Tuesday.

Lecturer Tafsiruzzaman of Adelaide University in Australia was the key speaker at the seminar, organised at the seminar room of academic building-1 of CUET. He discussed various important topics on civil engineering at the event, said a press release.

Immediately after the seminar, Didarul Alam, president of American Society of Civil Engineers Bangladesh section, spoke on 'Building a robust Civil Engineering Career for the Needs of the Future'. He praised various activities of ASCE student chapter at CUET.

The seminar was organised with the funding of CUET planning and development office.
